

natural wool blend

CYLINDER WRAP INSULATION

Up to 45% of the average household power bill is spent on heating hot water. Cylinder wraps are a natural way to increase the effectiveness of older electrically heated cylinders, saving up to 10% of monthly power bills.

APPLICATIONS

- Fits most older style hot water cylinders that do not have in-built insulation (pre 1998).

COMPOSITION

Terra Lana cylinder wraps are made from 100% natural wool batting laminated to a reinforced foil outer.

INSTALLATION

A sharp knife and roll of tape are all that is required.

NATURAL BENEFITS

EFFECTIVE	When used and installed in accordance with the Manufacturers instructions, Terra Lana Cylinder wraps will meet all the requirements of NZS 4305:1996 - Energy Efficiency - Domestic Type Hot Water Systems and the minimum requirements of N.Z.B.C Clause G12, Water Supplies.
SAFER	Wool is non-irritant, non-allergenic, non-toxic and odourless. Contains no harmful substances. Requires no protective clothing or masks to install.
DURABLE	Maintains its loft with natural crimp and fibre texture and therefore will continue to insulate for the lifetime of the dwelling.
ECO FRIENDLY	Wool is a naturally renewable and is a sustainable resource that breaks down quickly and safely when composted.

SUPERIOR NATURAL WARMTH

SPECIFICATIONS

CYLINDER WRAP	CODE	R Value	Dimensions (mm)	Recovered Thickness (mm)	Pieces per Bale	Bale Weight (Kg)
	TLCWDIY*	1.1	2150 x 1600	65	1	2.8
	TLCW	1.1	2150 x 1600	65	6	16.8

*DIY Kit includes 5m x 75mm natural wool pipe lagging, 5m foil tape, cable tie
