* BRANZ Appraised. Other R-Values extrapolated from BRANZ C518 testing.

- Products must be removed from packaging within 3 months to ensure full loft recovery
- Orders of 4 bales or less are subject to additional freight charges.
- Prices are FIS excluding GST; site delivery not included unless otherwise stated.
- Allow up to 2-3 weeks from order to delivery. Minimum order quantities may apply.

Returns Policy: Returned products must be returned to our Christchurch Factory in original unopened packaging, within 1 month of the purchase date; The customer is responsible for the freight on all returns; Custom made products are non-refundable; a 20% restocking fee is charged against the gross value of the returned products less freight (ex factory cost).

TERRALANA

BENEFITS OF TERRA LANA WOOL INSULATION

HEALTHIER FOR PEOPLE, BETTER FOR THE PLANET

IN-SERVICE PERFORMANCE

Terra Lana wool insulation is hygroscopic, enabling it to absorb and release water vapour. This natural phenomenon, unique to wool, distinguishes it from synthetic insulation. Insulation R-values are typically tested in dry laboratory environments and don't model the moisture present in real-world conditions. The unique properties of wool insulation mean it excels in managing moisture while maintaining its thermal performance. This crucial benefit helps reduce the risk of moisture buildup within the structure of buildings.

NATURAL & LOCALLY MADE

We source all the wool we can get from Banks Peninsula Farms, a collective of family-owned farms located less than an hour's drive from our factories—where we turn it into Terra Lana. This reduces transport emissions, enhances fibre quality control & traceability, and brings positive economic impact to the local community. By partnering with nearby suppliers, using industry waste wool, and manufacturing inhouse, Terra Lana promotes environmental and economic sustainability.

PRODUCT STEWARDSHIP

Terra Lana considers environmental impacts at each stage of the product life cycle. By offering custom manufacturing, we help architects design out construction waste and reduce on-site installation times. Any site offcuts can be recycled back into our production line to make new insulation. This makes Terra Lana insulation an excellent choice for Green Star and Homestar-rated projects, where product circularity, energy efficiency and waste reduction are key.

HEALTHY & SAFE

Terra Lana insulation can be handled without protective clothing and will not cause skin or respiratory irritation. Our products have a Declare label and are Red List Free, providing assurance that Terra Lana is a healthier option for builders, installers and the occupants of the building.

QUALITY & DURABILITY GUARANTEED

Our wool insulation comes with a 50-year warranty to meet the durability requirements of the New Zealand Building Code. The combination of New Zealand wool and thermal bonding technology creates a robust, structurally stable product that will not slump nor lose its loft over the lifetime of the building.

TERRA LANA

SKILLION CEILING WOOL INSULATION

PRODUCT DATA

The benefits of Terra Lana wool's superior performance designed for Skillion ceilings

v. APR2026

DESCRIPTION

Terra Lana harnesses all the benefits of wool's unique insulative qualities combined with innovative design for a truly high-performance skillion ceiling insulation.

We use natural and recycled materials and manufacture locally to modern sustainability standards.

APPLICATIONS

- Skillion ceiling (Truss ceiling or external walls where applicable)
- New and retrofit
- Residential buildings
- Commercial buildings.

FEATURES

- Designed to not slump or lose loft
- Superior insulative performance
- 100% recyclable (by Terra Lana)
- Easy to install, manufactured to fit
- Environmentally responsible product
- Naturally safe to handle & healthy in homes
- Manages moisture, maintaining thermal performance
- Excellent acoustic barrier qualities.

COMPLIANCE

- **BRANZ APPRAISED** Appraisal 682 [2022] (Other R-Values by extrapolation)
- **DECLARE RED LIST FREE** Certified toxin free
- **GREENGUARD** Indoor air quality approved
- **HOMESTAR/GREENSTAR** Credits available
- EPD (mid-2026 completion)
- **QUALITY ASSURANCE** 50 year warranty

COMPOSITION

≥60% NZ Wool, 20% Recycled PET, 20% PET (thermal binder)

TERRALANA

TIMBER I-BEAM FILLET WOOL INSULATION

PRODUCT DATA

The natural benefits of Terra Lana wool for optimal insulation of timber I-Beam systems

v. APR2026

DESCRIPTION

Timber I-Beams are often specified over standard solid timber framing to reduce thermal bridging and increase span capacity.

I-Beam's create voids that are difficult to insulate using standard insulation products. Terra Lana timber I-Beam fillets friction-fit within the voids to ensure maximum thermal performance.

APPLICATIONS

- hyJOIST rafters/joists
- Lumberworx rafters/joists

FEATURES

- The only specific solution available for timber I-Beams
- Maximises thermal performance of timber I-Beams
- Custom made to fit all timber I-Beam sizes
- Easy to install, manufactured to friction fit
- Environmentally responsible product
- Naturally safe to handle & healthy in homes
- 100% recyclable (by Terra Lana)

Note

When specifying vapour control layers, such as Pro Clima Intello, directly beneath rafters, consider spacing rafters at 600mm centres max. This will ensure the insulation can friction fit and be stapled to the edge of the rafter, without applying excessive pressure on the vapour control layer, or falling out of the cavity.

TERRALANA

EXTERIOR WALL WOOL INSULATION

PRODUCT DATA

The natural benefits of Terra Lana Wool designed for optimal exterior wall insulation

v. APR2026

DESCRIPTION

Terra Lana Wool Wall Insulation is designed with rigidity to friction fit within exterior wall cavities and not slump or degrade over the life of the building.

FEATURES

- Designed to not slump or lose loft
- Superior insulative performance
- 100% recyclable (by Terra Lana)
- Easy to install, manufactured to fit
- Environmentally responsible product
- Naturally safe to handle & healthy in homes
- Manages moisture, maintaining thermal performance

TERRALANA

SERVICE CAVITY WOOL INSULATION

PRODUCT DATA

The natural benefits of Terra Lana Wool Insulation designed to fill service cavities

v. APR2026

DESCRIPTION

Terra Lana service cavity insulation is designed to fill service cavity spaces adding R-Value to the thermal envelope, while still allowing the passage of wiring and plumbing services.

APPLICATIONS

- All ceiling and wall service cavities
- New and retrofit
- Residential and commercial buildings

FEATURES

- Designed to not slump or lose loft
- Superior insulative performance
- Easy to install, manufactured to fit
- Environmentally responsible product
- Naturally safe to handle & healthy in homes

TERRALANA

NEW BUILD DROP IN FLOOR WOOL INSULATION

PRODUCT DATA

The natural benefits of Terra Lana Wool insulation designed for new suspended floors

v. APR2026

FEATURES

- Designed to not slump or lose loft
- Superior insulative performance
- Easy to install, manufactured to fit
- Environmentally responsible product
- Naturally safe to handle & healthy in homes
- Proprietary installation system
- Excellent acoustic barrier qualities

APPLICATIONS

- New lined & unlined timber suspended floors
- Retrofit, installed from above
- Non-enclosed or enclosed perimeter foundation floors
- Residential and commercial buildings

DESCRIPTION

Designed to be **installed from above prior to sheet flooring**, Drop In Floor insulation is held by friction fit and Terra Lana's proprietary cradle-strap fastening system.

Terra Lana Drop In Floor Insulation is dense, semi-rigid and highly resistant to slumping, creating a wind-protecting layer that fills the underfloor voids leaving no gaps.

The wool component provides optimal thermal insulation, while also transmitting moisture away from the building and remaining effective even in damp underfloor conditions.

Terra Lana is locally manufactured from predominantly natural and recycled materials and is safe and easy to handle, providing an overall product solution to meet modern environmental compliance demands.

TERRALANA

RETROFIT UNDERFLOOR WOOL INSULATION

PRODUCT DATA

The superior natural benefits of Terra Lana Wool insulation designed for underfloors

v. APR2026

DESCRIPTION

Designed to fill existing underfloor cavities with a durable, semi-rigid, high performance wool composition that is easy to install. The rigid structure prevents sagging, air movement and heat loss through gaps. The wool component transmits moisture vapour away from the building and maintains effectiveness in humid or damp conditions.

APPLICATIONS

- Suspended floors, installed from the underside where there is a minimum 350mm clearance between the bearer and ground.
- Retrofit under existing floors only
- Residential and commercial buildings

FEATURES

- Designed to not slump or lose loft
- Superior insulative performance
- 100% recyclable (by Terra Lana)
- Easy to install, manufactured to fit
- Environmentally responsible product
- Naturally safe to handle & healthy in homes

TERRA LANA

CHATTERBLOCK® WOOL ACOUSTIC BLANKET

COMMERCIAL
RESIDENTIAL

The benefits of Terra Lana wool's unique natural qualities, designed to block out noise

v. MAR 2026

APPLICATIONS

- COMMERCIAL & RESIDENTIAL
- IT walls, ceilings, & floors
- Internal walls
- Timber and steel frame
- Acoustic baffle
- Ceiling tile overlay

PROJECT TYPE EXAMPLES

- Aged care
- Education
- Healthcare
- Office fitouts

FEATURES

- 100% recyclable
- NZ wool
- Made from 50% minimum recycled insulation
- Easy to cut and install
- Manufactured to fit framing centres
- Safe to handle
- Not affected by moisture
- Natural acoustic properties
- Non-Toxic, Non-Allergenic & Non-Irritant
- Absorbs VOC from building materials
- Resistant to vermin and insects
- Declare Certified—Red List Free
- Eco Choice certified.

DESCRIPTION

Terra Lana CHATTERBLOCK® Wool Acoustic Insulation is the only NZ range of wool-based acoustic insulation products.

Designed specifically as infill for applications within steel or timber stud partitions, walls, and over ceiling systems.

Starting at a density of 10kg/m³ to provide a large range of cost-effective solutions for reducing sound transmission between walls and floors, creating a highly effective sound absorption layer within specific required sound systems.

Available in segments and roll blankets in standard sizes, as well as customised sizings for correct product geometry to reduce install times and offcut waste.

All CHATTERBLOCK® products provide both acoustic & thermal insulative comfort to commercial and residential spaces.

COMPLIANCE

DECLARE RED LIST FREE
Certified toxin free

GREENGUARD
Indoor air quality approved

HOMESTAR/GREENSTAR
Credits available

QUALITY ASSURANCE
50 year warranty

GIB inclusion letter – Fire and
Acoustic STC Solutions

Masterspec and Smartspec
inclusion

COMPOSITION

≥ 50% recycled wool insulation,
blended with polyester thermal
binding fibre for enhanced
structural integrity.

ZERO WASTE

CHATTERBLOCK® is
manufactured to fit site framing,
reducing installation time and
offcuts. Recycle any offcuts in
Auckland and Christchurch.
Manufacturing trimmings
are reprocessed into more
CHATTERBLOCK®.

Follow our process [here](#).

PRODUCT TABLE

CHATTERBLOCK® WOOL ACOUSTIC INSULATION

v. MAR-2026

Designed for **commercial** and **residential** applications to effectively reduce inter-spacial noise transmission for partition walls, IT walls, ceilings and floors. CHATTERBLOCK® is available in standard dimensions in the below table and as custom widths and lengths when required. Minimum quantities may apply.

Residential standard product

GSM	DENSITY kg/m ³	THICKNESS mm	CENTRES mm	WIDTH mm	BALE CONTAINS	BALE M ²	R-VALUE	CODE
