Brad Stuart c/o Terra Lana

Subject: Substitution of Sound Control Infill

To Brad Stuart,

Winstone Wallboards Ltd (GIB®) have performance systems which give Noise reduction, typically using Pink® Batts® as the infill within these GIB® acoustic systems but due to preference sometimes other infill is specified.

If Terra Lana insulation is specified, this can be used as a substitute, we suggest Terra Lana should provide independent verification to confirm that the noise control performance of the system will be maintained.

Generally speaking, the FRR of the system won't be affected.

Regards,
