

DAGMAT®

FOR PLANT GUARD SYSTEMS

TERRA LANA

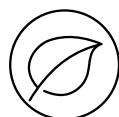

100% PURE NZ WOOL — THE PERFECT PLANT MAT

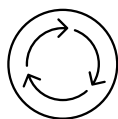

Terra Lana mix-grade wool is the ideal natural, eco-friendly and highly effective mat material for plant establishment. Maximize your plant survival rates, boost growth and save costs. DagMats are dense (750gsm), easy to install and precut at 200 or 250mm to fit square & triangle guards.

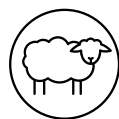

Made in NZ Manufactured in our own facilities for quality, dependable supply and economic & environmental sustainability

Biodegradable 100% dag wool means 100% biodegradable. No more nasty residues left in our soils. And plants love it!

Paddock to Plant Our wool is sourced directly from local farmers, greatly reducing processing and transport

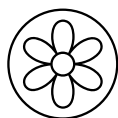

Powered by Poop As the Terra Lana DagMats biodegrade, nutrients like nitrogen, sulfur and magnesium are released to boost plant growth

Retain Water Terra Lana wool can hold three times its weight in water and provides a ground barrier that enhances water retention

Frost Protection Wool is warm. It's outstanding insulative quality protects tender plant roots from cold and frost damage

No Need to Spray or remove weeds. The thick, densely matted wool provides highly effective, longer lasting 6–12+ month weed suppression

Save all Round Factory direct, greater growth & survival and less maintenance with better weed suppression all equals reduced costs.
