

TERRA LANA WOOL INSULATION BENEFITS

Terra Lana insulation is the warmer, healthier, natural choice for your home.

PREMIUM PERFORMANCE

Wool is the best natural insulative fibre on the planet. Terra Lana insulation harnesses wool's unique abilities to keep your home warmer and drier.

THE NATURAL CHOICE

Wool grows on the back of a sheep—what's more natural than that? Our insulation uses industry waste wool and predominantly recycled materials.

HEALTHY & SAFE

Terra Lana is skin friendly to install and is Declare certified—meaning it's free of the 800+ toxic chemicals that can be found in building materials.

QUIETER

Terra Lana Wool has excellent acoustic barrier qualities and is specifically formulated with high density for even greater acoustic rating.

MOISTURE CONTROL

Terra Lana Wool absorbs and releases moisture vapour, helping regulate humidity and reduce damp for a more comfortable and healthy home.

DETOXIFYING

Wool even removes toxic vapour emitted from building materials and moulds, locking them away in its cellular structure. Breathe easy!

ALL SEASONS

Wool has the remarkable ability to continue keeping you cosy even when it's damp or humid. Warmer in winter, cooler in summer.

EASY TO INSTALL

Easily ripped to length by hand or cross cut with a craft knife, shears or insulation saw. We can custom pre-cut to order, saving on time and installation costs.

ECONOMICAL

Like any investment, Terra Lana will soon pay for itself with greater energy savings and lower maintenance costs, as well as helping save the environment.

DURABLE

Our Wool Insulation is thermally bonded with polyester for stability to keep it performing for the life of a home, backed by our 50 year warranty.

NZ MADE QUALITY

Terra Lana Wool insulation is processed and made using NZ materials in our Christchurch facilities and is BRANZ appraised.

CLOSING THE LOOP

We are passionate about responsible manufacturing through recycling, upcycling, cutting waste, local economy and reduced environmental footprint.

wrap your home in the superior natural warmth of wool

wool innovation for life
