- High Weed Control + Stabilisation 1000 gsm

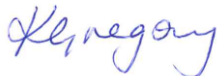

We encourage you to review the documents, in particular the Supervision Plan which shows upcoming (and completed) assessments. Your next assessment is a records review scheduled for February 2026.

You'll see that we've extended the validity of your certificate through to April 2026 to allow a three-month timeframe (Feb 26 to April 26) for completion of your annual verification. Please note, the due date for the annual assessment remains in **February** (twelve months from the date of licence issue).

I am delighted that Terra Lana has taken this step to have products certified by Eco Choice Aotearoa.

I look forward to working with you.

Noho ora mai

Keeli Gregory
Operations Manager
